MICHAELA MC ROWDIE

Full Stack Developer

+27 69 551 9408 · mikaelamcrowdie@gmail.com · kay-1512.github.io · Johannesburg, Gauteng

PROFILE

Full Stack Developer with 3+ years' experience building production SaaS platforms in Laravel and React/TypeScript. Currently part of a team delivering four platforms at Dev Science (programme compliance, healthcare, CRM/operations and web), with hands-on ownership of multi-tenant access control, audit logging, third-party API integrations and CI quality gates. Experienced in compliance-sensitive domains (POPIA, FHIR R4, QCTO). Community lead and mentor.

CORE TECHNICAL SKILLS

Backend: PHP (Laravel), Python (Django, DRF), Node.js, Java; REST API design, OAuth 2.0 integrations, Laravel Sanctum

Frontend: TypeScript, JavaScript (ES6+), React, Inertia.js, Vue.js, Tailwind CSS, HTML5, CSS3, Bootstrap

Architecture & Security: Multi-tenancy, role-based access control (Spatie permissions), audit logging, POPIA compliance, FHIR R4

Databases: MySQL (performance tuning, complex queries), PostgreSQL, MongoDB, SQLite

Testing & Quality: Pest, PHPUnit, PHPStan, ESLint, Jasmine, Selenium, UAT, GitHub Actions CI

DevOps & Tools: AWS (S3), Google Cloud Platform, Firebase, Docker, Git, GitHub, Heroku, DigitalOcean, Apache, Nginx, Laravel Herd

PROFESSIONAL EXPERIENCE

Full Stack Developer — Dev Science (Pty) Ltd *Aug 2026 – Present*

- Developer on a team delivering four Laravel, Inertia and React/TypeScript platforms: a programme-compliance platform for QCTO-accredited training providers, a multi-tenant healthcare and academy platform, a CRM and operations platform, and the company website with admin tools. Work ships through a production branch with automated CI checks
- Built multi-tenant access controls and security features across the platforms: platform custodian boundaries, admin impersonation of learner portals, restricted cross-tenant switching and permission-gated routes
- Implemented compliance and audit features, including POPIA audit logging on every patient-data read path and accreditation compliance document management with view-before-verify review
- Delivered healthcare modules (EMR record, orders and results, medication charts, lab and imaging queue, theatre board, prescribing decision support) and FHIR R4 read endpoints for interoperability
- Built billing and operations workflows: a revenue cycle (claims, debtors, reconciliation), work-experience placement with batch onboarding and capacity auto-assign, stipend confirmations, and contract expiry reminders with evidence-backed contract status that gates onboarding completion
- Built third-party integrations: TikTok, Instagram and LinkedIn publishing using OAuth, with token auto-refresh, publish-status polling, media upload, live preview and post analytics
- Improved engineering quality: repaired the CI pipeline (resolved 33 ESLint errors, regenerated the PHPStan baseline), removed a hardcoded API secret from configuration, wrote tests and seeders, and fixed schema-drift and relationship bugs that caused report errors

FullStack Software Developer — SkillsPanda *Jul 2025 – Jul 2026*

- Developed and maintained scalable backend systems using Laravel, MySQL and Django; designed and integrated RESTful APIs for internal and external services
- Optimised database performance and improved system reliability; collaborated with frontend teams working in Vue.js and React
- **Internal Operations CRM (SaaS):** built and enhanced a CRM for intern and student operations, with backend logic, reporting, API integrations and workflow automation
- **Kind Regards Platform (kindregards.careers):** backend developer on a live platform using Laravel and MySQL; built APIs and business logic and contributed to performance and scalability improvements

Junior Software Developer — Connect HR *Oct 2024 – Jul 2025*

- Built and maintained web applications using Django, Laravel, React, Bootstrap and JavaScript; implemented features, optimised databases and improved performance
- **Student Profile System:** designed a student management system using Django/FastAPI and Vue.js
- **Booking System and websites:** developed a scheduling platform and built and deployed multiple responsive websites

Tech Administrator — YES Programme *Feb 2024 – Dec 2024*

- Provided technical and QA support for web applications; verified functionality across browsers and devices; supported testing and release readiness

EARLIER PROJECTS

- **PandaBot Platform:** backend developer on a live youth-development system (Laravel, MySQL); built APIs, business logic and performance improvements
- **Learning Management System:** Django/FastAPI, PostgreSQL and Vue.js with authentication, role-based access and progress tracking

LEADERSHIP & COMMUNITY

- **Google Developer Groups Soweto — Lead Editor** (Mar 2023 – Present) and **Diversity & Inclusion Ambassador** (Oct 2023 – Present): organised developer events, supported community growth and promoted inclusive participation
- **Technical Events Volunteer, Mentor & Designer** (Jun 2023 – Dec 2024; GirlCode ZA, FIRST Lego League, WeThinkCode, DigiMarCon): mentored participants on projects, supported hackathons, contributed graphic design and refereed at national competitions

EDUCATION & CERTIFICATIONS

- WeThinkCode — Information Systems: Software Engineering
- Umuzi — Business Analysis
- IBM Applied DevOps Engineering Professional Certificate
- Coursera Professional Certificate — Meta Full Stack Developer: Front-End & Back-End Specialization
- WeThinkCode — GenAI Course for Software Engineers
- FNB App Academy — FullStack Development
- GirlCode — Python Bootcamp
- Tech4Dev — Web Development
